

Position offering: Electrical Installer

Company

EneRa is a dynamic startup company in renewable energy. Starting with distributing PV panels and inverters in the BeNeLux, we moved on towards storage solutions to balance intermittent electricity production and consumption. Our goal is to provide our commercial and industrial customers with the lowest electricity cost per kWhr.

We adapt our solution towards the customer's profile, so that he can benefit of the best result.

Thanks to our flexible 'Electricity Flow Management System', we can monitor and control a multiple of battery and power electronics technologies and are brand independent.

Our platform software allows companies to monitor and control their different sites. The system is optimized through the usage of predictive algorithms and machine learning.

Focused on quality products & services, durable relationships with customers and suppliers, we give the best results and conditions the market has to offer.

As the business of renewable energy is growing fast and new tendencies and applications are about to break through, it is important to be lean and adapt quickly. In order to make this a success, we combine our in depth technical knowledge with local market knowledge both in Western Europe as in developing countries.

Passion, knowledge, a goal oriented hands-on approach and a customer focus are the team's key success factors!

In order to realize this further growth, we are searching for a:

Function Description

You are a hands on professional who can work independently as well as in team. You will install electrical equipment in residential as well as at commercial, public or industrial premises.

The electrical equipment can be batteries, chargers, inverters, automatic switches, automates, digital as well as analog devices, PV panels,

You work with measurement and internet equipment as well as with low voltage AC and high voltage DC.

You visit customers to make a first technical evaluation, you assist in the quotation process and you complete the installation within the agreed timelines.

You are a representative of EneRa and therefor the quality of your work and your work ethics are outstanding.

Capabilities & experiences

- you are familiar to work in an industrial and residential environment
- you are proud about the Quality of your work
- having a bachelor degree is an advantage but this can be compensated with relevant and proven experience
- an entrepreneurial behavior with at least 7 years of professional experience
- being passionate about 'green energy' and technology
- you are fully up to date with the latest rules, legislation and best practices
- fluent in Dutch and/or French

We offer you a competitive remuneration package and an outlet for your passion and your technical skills to drive & support the roll out of renewable energy that will lead to a 95% ecological friendly energy production by 2050!

There is also the possibility to offer your services as an independent installer or service provider.
